Work Experience:

SCHEID ARCHITECTURAL: DESIGNER/DRAFTER (May 2019- Present)

Working at Scheid Architectural, a small firm, I am given a great deal of responsibility and, likewise, gained versatility. With Scheid, I assist in many tasks including compiling complete CD sets under supervision, on-site documentation of existing conditions which has had me traveling to different states, as well as meeting very pressing deadlines while juggling multiple projects which has required me to communicate effectively with a team as well as adequately prioritize projects.

KIDENEY ARCHITECTS: DESIGNER/DRAFTER (Summer/Winter 2018)

Interned with KideneY and assisted on different types of commercial projects doing various tasks on each. Work consisted mainly of assisting in construction documentation in preparation to go out to bid, participating in client and firm meetings, making site visits for documentation and verification, as well as some design work.

DIVERSIFIED SPECIALTY SOLUTIONS LLC: DESIGNER/DRAFTER (Winter/Spring 2016)

Using Thingiverse (a website which people post 3D objects for printing), I was in contact with an engineer from Diversified Specialty Solutions LLC who wanted a 3D model of a potato peel machine designed to show a client. Using a few rough sketches from the engineer, we were able to collaborate together to come up with a design solution and a model to fit their wants.

Education:

Bachelors of Architecture (BArch)
Urban Design Concentration
May 2019

SUNY Alfred State
Alfred, New York
3.5/4.0
